

RAL ANGELO LLUISMA

Iligan City, Philippines | +63 923 547 047 | ralangelolluisma@gmail.com
github.com/Ralimations | linkedin.com/in/ral-angelo-lluisma

Education

Mindanao State University - Iligan Institute of Technology

Iligan City, Philippines

Bachelor of Science in Computer Applications

Graduated July 2026

- Concentrations: *Internet of Things, Embedded Systems, Firmware Programming, and Data Communication.*
- *Related Coursework: Programming for IoT, Applied IoT, Artificial Intelligence in IoT, Fundamentals of Robotics Systems, Microcontrollers, Digital Techniques, Computer Architecture, Firmware, PLC Programming, Operating Systems, and Technopreneurship.*
- Thesis: AutoMatTsek - A Modular IoT-Based On-Shelf Stock Monitoring and Pricing Display System.

Experience

MELD CX

Cagayan De Oro City, Philippines

Information Technology Intern, Front-End Development - 700 hours

January 2026 – May 2026

- Developed and maintained front-end interfaces by translating UI/UX concepts into functional components and resolving layout, responsiveness, and usability issues.
- Fixed front-end bugs and refined interface behavior and visual consistency based on feedback from senior developers and project stakeholders.
- Provided cross-functional technical support for software and AI experiments involving Streamlit applications, offline AI-box setup, and computer-vision group-detection workflows.
- Configured and tested locally hosted large language models using LM Studio and Ollama, supporting offline inference and AI-box deployment experiments.
- Prototyped generative AI applications with Streamlit, integrating local LLM endpoints into interactive user interfaces and internal demonstration tools.
- Evaluated local model behavior, prompt responses, resource usage, and deployment limitations across different hardware and software configurations.
- Provided cross-functional technical support for computer-vision and group-detection workflows, including application setup, testing, validation, and troubleshooting.
- Produced troubleshooting guides, validation procedures, technical documentation, presentations, and Scrum meeting minutes covering decisions, blockers, and assigned action items.
- Completed hands-on drone assembly and piloting activities through the TESDA SPARK Program.

Voxel Studios

Netherlands (Remote)

Senior Animator

August 2023 - July 2025

- Led a team of animators in producing commission-based media projects using Mine-imator.
- Managed project deliverables while meeting established quality standards and deadlines.
- Mentored junior animators and guided them in creatively executing project objectives.
- Produced animations and conducted individual progress reviews for junior and peer animators.

Selected Projects

Ralskies Shorts Manager & Scheduler

In Progress

Electron, Node.js, JavaScript, YouTube Data API v3, OAuth 2.0, SHA-256, XLSX

- Building a local-first desktop application that organizes, batches, tracks, schedules, and verifies a real YouTube Shorts workflow.
- Implemented SHA-256 media identity for duplicate detection and deterministic matching between local files, tracker records, staged media, and private YouTube uploads.
- Actively used on the Ralskies Channel and provided 114% view growth.

Ralskies Artist Website

March 2026

Web Development, Email Integration

- Developing an artist website for Ralskies with a focused presentation of music, content, and creator identity.
- Implementing email/contact integration to support audience and collaboration inquiries through a maintainable web workflow.

Streamlit AI Data Analytics Chatbot

Personal Project

Python, Streamlit, Local LLM/API Integration

- Developed an interactive chatbot prototype Proof of Concept during my OJT that combines natural-language questions with data exploration and analytics workflows.
- Integrated locally hosted language-model endpoints into a Streamlit interface and validated responses, resource usage, and deployment constraints.

A.R.I.A. Studio / Tuberskies

March 2026 - April 2026

React, TypeScript, Python, FastAPI, Recharts

- Developed a creator-analytics workspace that converts performance data into dashboards, milestones, alerts, and recommended actions.

Guided Pose Program - Microcomputer-based Physical Education Guide System

MSU-IIT, Iligan City

Lead Programmer

September 2025 - December 2025

- Led the software development of a microcomputer-based exercise guide system created by a team of eight, providing real-time posture correction and voice feedback for physical education activities.
- Designed and developed the core computer-vision module using Python and OpenCV to track, analyze, and evaluate user movements.
- Integrated pose-detection logic, corrective feedback, and voice guidance into the functional prototype. Led team members on project requirements, testing, documentation, and final presentation.

PCB Designing

MSU-IIT, Iligan City

Project Contributor

February 2024 - April 2024

- Assisted with component placement, circuit routing, and design checks as part of a collaborative PCB design project.
- Contributed to preparing the board layout and Gerber files for manufacturing.

AM Transmitter

MSU-IIT, Iligan City

Hardware Troubleshooter, Documenter

November 2023 - December 2023

- Built an AM transmitter using a 555 timer, microphone, and amplifier circuit to modulate and broadcast audio signals.
- Collaborated with team members during circuit assembly, testing, and troubleshooting to ensure proper audio modulation and signal transmission.

Variable Power Supply

MSU-IIT, Iligan City

Project Documenter

May 2023 - June 2023

- Documented the team's design, assembly, PCB fabrication, soldering, and testing processes for a 12V variable power supply.
- Coordinated with team members to gather technical details, component specifications, test results, and project updates.
- Prepared clear project records, progress documentation, and supporting materials based on the circuit schematic and completed prototype.
- Assisted the team during assembly and testing while recording issues, troubleshooting steps, and final performance results.

Certifications, Microcredentials & Training

Data Preparation and Annotation Microcredential

Cagayan de Oro City, Philippines

SPARK-Skunkworks, in partnership with TESDA

May 18-May 29, 2026

- Prepared computer-vision datasets by extracting image frames from video files and organizing them for annotation.
- Annotated images for object detection using labeled bounding boxes and quality-checked the resulting dataset.
- Trained a custom object-detection model using the completed annotated dataset.

Drone Design and Construction, Drone Operations, and Pilot Training

Cagayan de Oro City, Philippines

SPARK-Skunkworks, in partnership with TESDA

June 16-July 6, 2026

- Studied essential drone components and designed a custom drone frame using Onshape.
- Practiced flight controls and maneuvers through the Uncrashed simulator and safe introductory flights using a whoop drone.
- Completed field-based obstacle and flight-path exercises using both Line-of-Sight and First-Person View operating modes.

Prompt Like an Engineer

CISCO NETWORKING ACADEMY

Cisco

Sept 6-Sept 15, 2026

- Practiced applying an engineering mindset to design, iterate, verify, and reuse prompts as a repeatable process.
- Understood how chatbots and large language models work, how to choose between cloud and local AI tools while protecting sensitive data, and how to systematically evaluate AI outputs, keeping a human in the lead and remaining accountable for the quality of their work.

Branding and UI Web Design

Iligan City, Philippines

SEVEN STUDIOS

2024

- Studying essential color theory and design principles
- Practiced Photoshop basics
- Worked on Client Branding and Web-Design

Skills

- **Programming & Development:** React, TypeScript, JavaScript, Python, Node.js, Electron, PowerShell, Excel/ExcelJS, SQLite/MySQL, Git/GitHub, C++, Embedded C
- **AI, QA & Operations:** Local LLM/API testing, prompt and structured-output QA, runbooks, local deployment
- **Computer Vision, IoT & Hardware:** OpenCV, TensorFlow/TFLite, Label Studio, YOLO/OpenVINO exposure, ESP32, RFID, Arduino, serial communication, drone building and piloting
- **Creative & Design:** Mine-imator, animation production, Autodesk EAGLE, Onshape, PCB layout, CANVA, Photoshop, Video Editing, music production, and vocal mixing. Creator and manager of Ralskies, a YouTube channel focused on vocal covers and music content.
